SKILLS

React, Node, Express, MySQL, JS/TS, Jest/Vitest, React Testing Library, Deployment (Vercel, Heroku & Netlify), GitHub/GitFlow, Pair Programming, HTML, CSS, Sass, Photoshop, Google Workspace, Slack

PROFILE

I love web development because in it I have discovered endless opportunities to learn, flex my creative muscles, and problem solve as an individual, as part of a team, and a global community.

As a software engineer, I draw from skills I have developed at Kraken and BrainStation, whilst harnessing a range of professional practices through my time as in the charity sector. Given autonomy and a solo project, I work enthusiastically and responsibly, but always welcome an opportunity to collaborate with other developers, adjacent teams and stakeholders. My suitability for this industry is found primarily in my patience, attention to detail and adaptability, which I have honed through a varied workload on both long-term projects and reactive, time-sensitive assignments alike.

EXPERIENCE

Associate Frontend Developer | Kraken Technologies

NOV 2024 - PRESENT, LONDON / BRIGHTON

- Collaborated on the Octopus Energy UK Dashboarding Team, contributing to the optimisation of user experience and maintaining a delightful and accessible web app.

Communications & Fundraising Manager | Allsorts Youth Project

SEP 2019 - JUN 2024, BRIGHTON

- Managed, developed and delivered the charity's updated fundraising and communications strategy, which generated an increased annual income of 88% in 5 years.
- Rebranded Allsorts' visual and written identity, designing and implementing changes across public platforms.

Supervisor | Loading Brighton (Gaming Café) | MAR 2019 - SEP 2019
Supervisor | Zona Rosa (Mexican Restaurant) | APR 2018 - MAR 2019
English Teacher | EC Brighton (English Language School) | MAR 2018 - APR 2018
